

FOR IMMEDIATE RELEASE

## PUBLIC SAFETY BROADBAND CONSORTIUM ADDS NEW MEMBERS

Complete Membership to Exhibit at 2007 International  
Wireless Communications Expo in Las Vegas

Las Vegas, Nevada, March 27, 2007 – The Public Safety Broadband Consortium, founded by Public Safety Broadband, InfiNet Wireless, WiFi-Citywide and Insight Video Net to advance the efforts of emergency response and wireless interoperability, today announced that it has added several new members and partners, all of which will exhibit at the upcoming 2007 International Wireless Communications Expo (ICWE) from March 28-30 in Las Vegas. The Consortium's new members and partners represent a wide range of wireless applications and together offer a complete public safety broadband solution.

They include:

Data911 – a manufacturer of ruggedized mobile data hardware for wireless data communications in the automotive environment (Booth 19044)

Dataradio – the designer and manufacturer of advanced wireless data products and systems for mission-critical applications (Booth 5027)

Mobile Mark Communications Antennas – a designer and manufacturer of antennas for 800 MHz – 10 GHz (Booth 13047)

Radio IP Software – a provider of innovative connectionware solutions to facilitate and improve interoperable data connections between remote mobile environments and central office locations (Booth 5046)

ShotSpotter, Inc. – the leading developer of gunshot location systems and technology (Booth 18063)

SkyPilot Networks – a leading provider of carrier-class wireless mesh solutions that enable service providers, municipalities, and public safety agencies to rapidly deploy cost-effective broadband access, voice over IP, public and private Wi-Fi access, video surveillance, and other wireless applications (Booth 13062)

“The rapidly changing needs and demands placed on today's municipal wireless and public safety networks require a new approach,” said Mike Doble, CEO of founding member Public Safety Broadband. “The collaboration of these leading technology companies will greatly advance the availability of interoperable wireless communications products for these markets.”

The 2007 ICWE will bring together public safety professionals, dealers, technology end-users, wireless service providers and IT professionals for the most comprehensive educational program on wireless communications technology in the world. The Consortium's founding members and partners will also exhibit at the event: Public Safety Broadband (Booth 18063), InfiNet Wireless (Booth 19062) and WiFi-Citywide (Booth 18063).

---

## About ICWE

North America's largest annual wireless communications technologies show, IWCE features over 350 exhibitors in land mobile radio, paging, PCS/cellular, antennas and accessories, telematics/mobile data, 802.11/Wi-Fi/WiMax, RF Engineering, VoIP, GPS, towers, and more. The conference is sponsored by MRT magazine and offers over 6500 participants a 5-day educational program of workshops, seminars, and special events focusing on the fundamentals of wireless networks to the most advanced technology. Additional information can be found at [www.iwceexpo.com](http://www.iwceexpo.com).

## About The Public Safety Broadband Consortium

The Public Safety Broadband Consortium offers a total public safety solution for broadband wireless networks and wireless applications. The collaboration of these best-in-class technology companies delivers bandwidth, incident area coverage, and network integrity to first responders when multiple forms of mobile communication are necessary. Founded originally by Public Safety Broadband, InfiNet Wireless, WiFi-Citywide, and Insight Video Net, the Consortium now features a dozen members and partners dedicated to advancing the efforts of emergency response and wireless interoperability. Additional information can be found at [www.publicsafetybroadband.com](http://www.publicsafetybroadband.com).
